Security minimalism
I removed a feature on purpose
The built-in HTTPS server is gone.
keyblind.devblind AI to your keys

What it was

Automatic Let's Encrypt TLS for the local dashboard.
keyblind.devblind AI to your keys

Why it sounded good

HTTPS everywhere, zero config.
keyblind.devblind AI to your keys

Keyblind
04 / 08

Why I killed it

188 lines plus a dependency tree, all adding attack surface.

keyblind.devblind AI to your keys

Keyblind
05 / 08

The tradeoff

A secrets tool shouldn't bundle its own TLS stack.
keyblind.devblind AI to your keys

Keyblind
06 / 08

Less is more

Fewer dependencies, less to exploit, easier to audit.
keyblind.devblind AI to your keys

Keyblind
07 / 08

The lesson

The best security feature is sometimes the one you delete.

The result

Smaller code, cleaner npm audit, same dashboard.
